

A PRAYER OF ECOLOGICAL CONSECRATION TO MARY, MOTHER AND QUEEN OF CREATION

O Mary, Mother of God, Queen of the visible and invisible world, you who cared for Jesus, who accompanied and supported him to the end, you who mourned his death, Mother of tenderness at the foot of the cross, you are today at the bedside of this wounded world.

With your heart pierced, you sympathize with the suffering of all the victims, human and non-human, of this ravaged planet, by a brutal and harmful system.

You mourn the death of people and ecosystems alike, crucified on corrupt systems built by greed and desire for gain.

You, who from the beginning were chosen to give Life and defeat the forces of death, you who know that these earthly contractions and pains want to give birth to a new world, I choose you today as Mother and Queen, as guide and inspiration for my integral ecological conversion.

I entrust to you the healing of my eyes, my heart, my intelligence and my soul, so that I may adjust myself ever more closely to the Father's loving plan for Creation.

I want to place myself, body and soul, at your disposal. Teach me humility so that space for the miraculous, unfolds within me. Help me to free myself from destructive addictions. In this freedom, may I become more and more an instrument of the Spirit.

Through your maternal love, inspire my commitment, my life choices, my daily actions, my words and my defiant actions.

Grant that I may be a witness to true freedom and happy determination, a witness to the joy of giving, sharing and helping others, a witness to the joy that dwells in me when I adjust to my deepest desire, to my vocation as a living person, to my identity as a child of God called to love. **AMEN**
